

Cumulative Index to Volumes XI-XV, 1967-1971

The following cumulative index supplements the same kind of index prepared for Volumes I-X (1957-1966), which was published in the *Midwest Journal of Political Science*, XI (May 1967), 225-255. This supplement was prepared by James S. Thomason, Northwestern University, using the TRIAL program operative for the CDC 6400 at Northwestern's Vogelback Computing Center.

The title, or topical index, the first listing printed below, is a "key-word-in-context," or KWIC index, printed so that, either on one or both sides of a given alphabetized key word, at least a portion of the title will be seen on a line along with the key word. In addition, each topical index is accompanied by two other pieces of information: at least part of the first author's last name, and a code to locate the specific article by date and volume number. For example, the first citation is for the word "action," located in the middle of the line. On the far right side of the first line is the author's name (Burgess PM), and the code 13-M-69. The volume number for that reference is indicated by the number 13; M stands for the month of May (F=February, A=August, N=November); and the number 69 indicates that the 13th volume was published in 1969. By checking the author cross-reference, the full citation for the article may be located, e.g. Burgess, P.M., and Robinson, J.A., "Alliances and the Theory of Collective Action: A Simulation of Coalition Processes."

The author cross-reference is a "key-word-out-of-context," or KWOC index, with the key word, in the present case the author's name, printed out of context. Following this KWOC key word for each article is a full citation of the title, along with the publication code and a list of co-authors (if any).
